# LEGENDS

Standard **availability of all the specified products is 2-5 weeks** from the time an order is placed, depending on the type of product, quantity and potential individual requirements. Placing an order includes approval of the final design preview. We will confirm the delivery deadline for specific products always on the basis of your inquiry or order. Please give the quantity, colour, possibly the capacity and the required PRINT in your inquiry.

**Products in stock** are identified with the "24H" icon and can be shipped within 24 hours. **All catalogue numbers are unique** and are used exclusively for the requirements of this catalogue.

USB flash drives have been the most popular promotional items for over a decade. They are a good-value and useful gift for everyone, and are increasingly used as a medium for distributing company data.

You will discover that not all USB flash drives are the same on the following pages. Thanks to new technologies and trends, USB flash drives are continuously undergoing development, which is why they retain their popularity.

This year we will introduce a range of innovations again. The “standard memory capacity” for 2016 is 16/32 GB. Main trends this year include:

**USB 3.0 FLASH DRIVES**

with much higher transfer speeds than standard USB 2.0.

**POWER BANKS WITH FLASH DRIVE**

**OTG FLASH DRIVES WITH USB 2.0 AND 3.0**

for Android mobile phones and tablets

**GLASS USB FLASH DRIVES**

with 2D or 3D laser engraving and LED back-lighting

**USB PENS AND STYLUSES**

in luxury and slim versions

**METAL MINI FLASH DRIVES**

with USB 2.0 and 3.0

## USB FLASH DRIVES / OTG

 8-64 GB

### USB OTG (On - The - Go)

Flash drives communicate not only with PCs through a classic USB connector, but also use a micro USB connector to connect to smartphones and tablets with Android version 4.3 OS or higher. They provide an easy way to backup, transfer photos, music, films, contacts, applications, etc.

We offer some models with a USB 3.0 interface, which means the transfer speed is many times higher.

**Mini USB FLASH DRIVES**

Modern, small, practical and fast - these are the key characteristics of trends for new USB flash drive models. We use new materials and water-resistant chips, our products are naturally easy to handle (without a cap) and can be attached to your keys.

USBG011

Luxury glass USB flash drives offer the option of combining classic laser engraving (or PRINT) with unique **2D/3D laser engraving** into the glass section. The effect of the laser engraved glass is emphasised by the **LED diode**, which lights up and flashes when the drive is connected to a PC, always in the selected colour (**blue, red, green, yellow, white**).

# POWER BANKS - PORTABLE CHARGERS

POWER BANKS (external portable batteries) are currently one of the greatest hits as a promotional gift. This is a portable power source for various mobile devices, which can be used to recharge batteries at any time in order to revive your mobile phone, smartphone, tablet, speaker, camera, fitness band, e-book, MP3 player, etc.

We will be happy to help you choose a suitable model and advise you what to focus on when making your choice. As well as design, material and colour, power banks differ by the capacity of the built-in batteries, their type and quality, the number of output USB ports, the number of charging cycles and the charge speed. Safety features, i.e. over-charge protection, over-voltage protection, over-current protection and short-circuit protection, are also very important. All the power banks we supply are properly tested before being shipped from the factory.

## CRYSTAL POWER BANKS

LED logo and CMYK PRINT

We supply all our power banks with a micro USB cable, possibly other connectors depending on the client's requirements, packaged in a box.

## TRAVEL SETS

## WITH CAR ADAPTER

## WIRELESS CHARGERS

## CREDIT CARD SHAPED

Battery capacity (in mAh) determines the number of times a specific device can be charged, the charging speed is defined by the output current (in mA). An output current of 1 A is sufficient to charge less demanding mobile phones or small tablets. Power banks with an output of 2.1 A should be used for more powerful smartphones and tablets.

## IMITATION LEATHER

## WITH FULL-SURFACE CMYK PRINT

## WITH HAND WARMER

## Crystal power banks

Look great and have a unique design. They offer unique branding options. CMYK or pad PRINT with a backlit LED logo or part of an image can be combined on the front. The reverse side can also be printed according to the customer's choice. The transparent acrylic layer on the front and the crystal gift box emphasise the impression of luxury.

# POWER BANKS - PORTABLE CHARGERS / WITH USB DRIVE

## Power banks with USB capacity

Power banks with optional USB flash drive (4-32 GB, or no capacity) are a combination of the two most popular IT gifts. They are also popular due to their small size (slim design, card format).

The range of three models of power bank with USB drive, in a luxurious design, with a practical leather case, can also be used as a business card or credit card holder, etc. The battery capacities are 2200 / 3000 / 4000 mAh and all three models are also available in several colours.

### Eco wooden power banks

If you are looking for a product that is capable of attracting attention, then wood power banks are the right product for you. This range offers a wide range of capacities, from 2600 to 10400 mAh, and two shades of wood. You can use the lower capacity wood power banks as a cheaper gift and higher capacity power banks as a managerial gift. The natural cardboard packaging conforms to the ECO concept.

## POWER BANKS - PORTABLE CHARGERS / CAR JUMPER

The Car Jump Starter power bank is an invaluable assistant, not only when travelling by car! This external charger has a wide range of use: as well as being used as a standard mobile device charger, it is also capable of jump starting a car with a flat battery several times and can also be used as a powerful LED light. Most models can also charge laptops and have SOS light signalisation available. Their light weight and small dimensions are also an advantage. Car Jump & Pump sets, supplied in a plastic case, also include a compressor for inflating tyres, which cyclists and motorcyclists will be sure to appreciate. The power bank will hold a charge for up to 7 months after being charged! A versatile tool, which can be used to resolve a wide range of unpleasant situations.

## WIRELESS CHARGERS - QI PADS

Wireless (induction) chargers are no longer just the future of charging. Thanks to Qi technology they are increasingly becoming an accessible method of comfortably charging smartphones, etc. If a telephone is equipped with a Qi receiver (this may be integrated in the telephone, or can be purchased separately), you simply place the phone on the pad and charging begins automatically. Our Qi chargers are suitable for all smartphone or iPhone models equipped with a receiver for wireless charging.

During its existence, the USB phenomenon has become the dominant interface for connecting IT devices of practically all types, for controlling them, charging them or for transferring data. Not only do USB 3.0 HUBS significantly increase the number of USB ports, which can be used on your laptop or PC. They also offer a much higher data transfer speed (up to 600 MB/s) than the previous USB 2.0 generation. All models are also compatible with USB 2.0 and USB 1.1 and support all standard operating systems. Overvoltage protection is a matter of course.

# LASER KEYBOARD

## KBR180

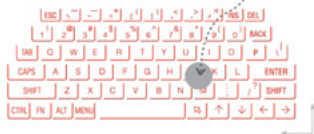

### Laser keyboard for mobile phones and computers

The virtual “laser” keyboard is a groundbreaking device. You no longer have to carry additional cumbersome hardware with you, all you need is a laser lamp, which creates an image of a keyboard on your table. And you can begin typing.

This product is used as keyboard via Bluetooth HID and USB HID connection.

#### LAYOUT PLANE

78×40×20 mm    **LOGO** 50×15 mm

**PRINT** T

**MOQ** 10

How does this work? You place a small box on the table, which then projects the image of a keyboard on the surface. It also records which button you touched and sends this information to the portable device through Bluetooth.

PC mice are a perennial favourite among promotional gifts. More and more people are using wireless mice, because they offer much more freedom and comfort for work. Mice with full-surface full-colour PRINT are popular from the aspect of the impact of the promotional message.

## WIRELESS BLUETOOTH SPEAKERS

Wireless speakers are compatible with devices, which support Bluetooth (iPhone, smartphone, mobile phone, tablet, iPad, PC, etc.) They allow you to play music from these devices remotely, most models also have speakerphone capabilities or allow you to select the next or previous song.

### SPK050 POWER BANK BLUETOOTH SPEAKER WITH HANDSFREE

A unique Bluetooth speaker with excellent sound and design. It is available in a speaker version or a version combining a speaker + power bank with a capacity of 2000-5000 mAh. Suction pads make it easy to attach to any smooth surface. Music can also be played from an inserted micro SD card. The handsfree function provides speakerphone capabilities thanks to the integrated microphone.

The optional NFC function enables speakers to be paired with a mobile phone (or other device) with a simple touch. We recommend the very effective branding option be utilised, in combination with CMYK (or pad) PRINT and LED backlighting of a logo or part of an image.

#### SPEAKER

Bluetooth 3.0 + EDR, range up to 10 m

## FITNESS BANDS AND SMART WATCHES

“Wearable electronics” are becoming a very desirable accessory, not only for active people. Fitness bands are mainly intended as a motivator, which monitors the number of steps taken, distance and burnt calories. They inform you when you need to get up off your chair and stretch or reveal how well and how long you slept for. They show incoming calls and SMS messages. They naturally also show the date and time and are also capable of waking you with gentle vibrations on your wrist. The remote shutter release can control the camera on your smartphone. Higher-end models have added functions such as telephony, SMS message sending capability, anti-lost alarm, etc. Due to the light materials they are made of, you won't even be aware you are wearing them.

### FIT010 LUXURY SMART WATCHES, SUPER DESIGN AND FUNCTION

#### Key functions:

Telephony, sending SMS messages, measuring heart rate, EKG, pedometer, sleep monitor, calories, calendar, alarm, date and time, Bluetooth shutter release, anti-lost, music player, dictaphone, calculator, stop-watch, personal applications. These watches are waterproof (IP65) and dust-resistant. The leather wristband can be replaced with a metal or silicone band.

# VIDEO IN PRINT

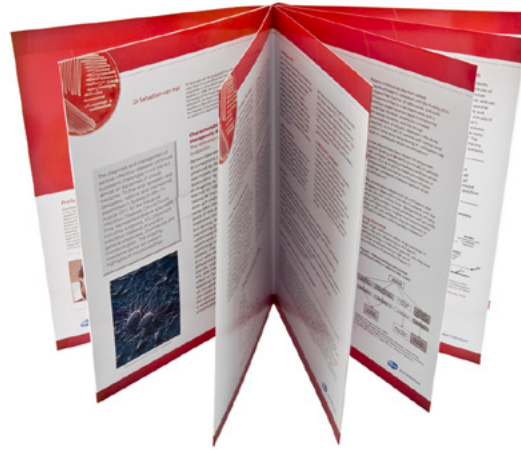

## LCD video brochures

We present a modern and extremely effective presentation and promotional item. This combination of a high-quality video and luxury, full-colour printed paper brochure guarantees that your promotional message will affect everyone who receives this medium. The LCD display (4:3 or 16:9) is integrated into the presentation folder, which is printed with your design. There may be up to 11 control elements, for volume, individual videos or language mutations.

You can also change the content, possibly utilise the USB capacity for additional data, such as photos, press reports, etc. We will propose the design, PRINT and dimensions of the presentation according to the customer's requirements. You can choose matt or glossy versions, or add gold or silver deboss or partial varnish.

Video brochures are frequently used mainly in areas such as promotion of new brands or re-branding, sampling events, celebratory occasions and gala-evenings, potentially as an original thank you gift in digital form.

They have a wide range of use in relation to developer projects, in the field of pharmacy, for presentation of medical facilities, in the automotive industry, during training courses, etc.

MOQ 25
